

MFC Switchbox™ For molbox1™ and MFC-CB™

- **Accessory to molbox1 with MFC option or MFC-CB**
- **MFC- Switchbox can be controlled by molbox1 or MFC-CB**
- **Supplies power and switches between up to five MFC or MFMs On one molbox1 or MFC-CB channel**

Specifications

Power Requirements::	85 to 264 V VAC, 50 to 60 Hz 55 VA max. consumption
Cooling:	Active fan driven air circulation
MFC Power Supply:	±15 V, 260 mA per channel on up to five channels
MFC Port Connectors:	Five 25 pin females DSUB metal case socket
MFC Valve Test Point and Current Measurement:	Available only on channel 1
Weight:	1.5 kg (3.25 lb)
dimensions (L x W x H):	22.5 cm x 7.5 cm x 20.0 cm

Description

The MFC Switchbox is an accessory to the molbox1TM MFC option and MFC-CB mass flow control box. This accessory continuously powers up to five MFCs and /or MFMs (DUTs) and allows switching control between them on one molbox1 or MFC-CB channel.

The MFC switchbox contains internal switches to switch between five 25 pin MFC connection ports. Molbox 1 and MFC-CB support switchbox control allowing MFC switchbox channels to be changed by simple front panel menu selection or remote ASCII string commands.

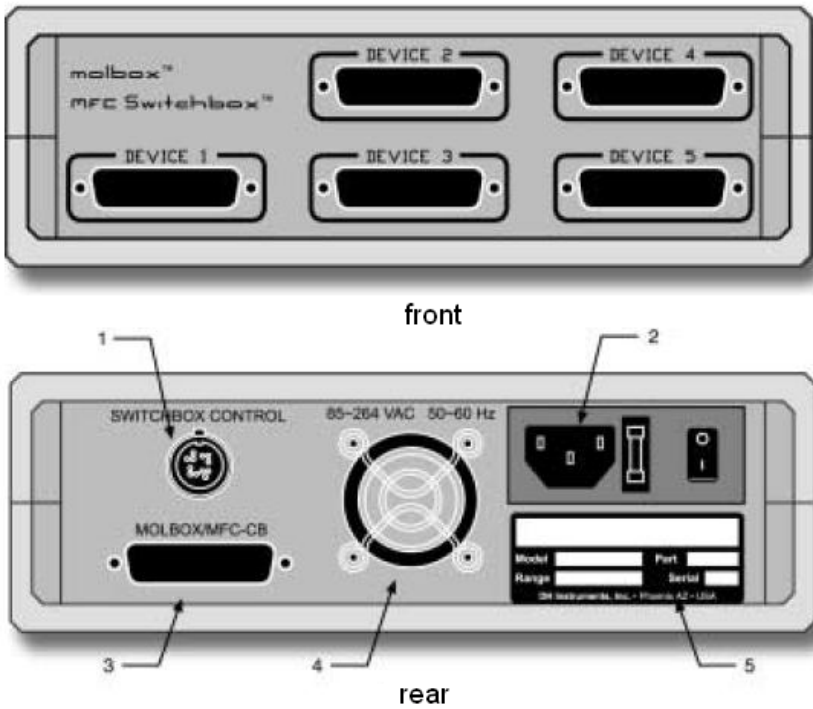

The MFC switchbox has its own power supply which is configured to maintain continuous power to all five connection ports simultaneously. This allows an MFC to be tested on one channel while other MFCs are warming up. This feature is particularly useful for the many types of MFCs that require an extensive uninterrupted warm up period to operate within stated specifications.

The MFC switchbox supports COMPASS[®] for molbox software's split control in which an MFC in one range can be used to automatically control the flow to measuring DUTs (such as MFMs) of other ranges. The controlling MFC is connected to channel 1 and the measuring DUTs are connected to the other four channels.

Note: MFC switchbox is intended for use with voltage based MFCs. Only one current based MFC at a time can be connected.

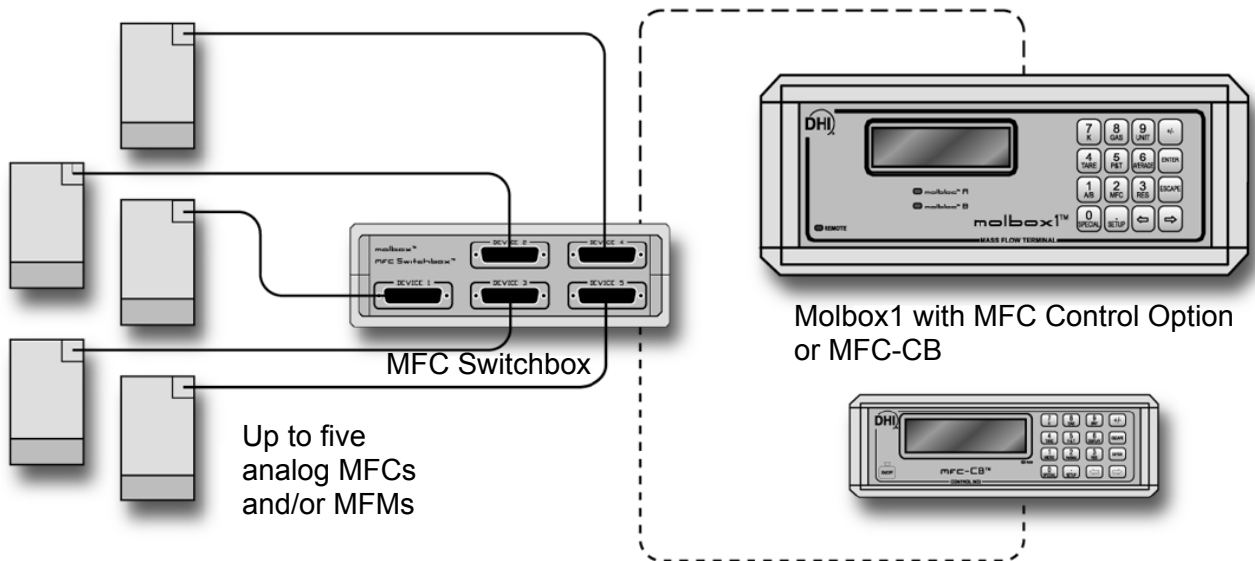

The MFC switchbox is connected to the molbox1 or MFC-CB MFC control connection and the switchbox communications port using cables supplied with the switchbox. The MFC connection cables (not included) are the same as those used when connecting directly to molbox1 or MFC-CB.

Panels

- 1. To molbox/MFC-CB switchbox control
- 2. Electrical power connector
- 3. To molbox/MFC-CB port
- 4. FAN
- 5. Product label

Ordering Informations

MFC-Switchbox is delivered complete with:

- MFC Switchbox control cable
- Molbox1 or MFC-CB to MFC Switchbox cable
- Power cord
- User's Manual

Product Designation: MFC Switchbox

Part Number: 401347
