

Adapter block with two quick connectors for pressure gauges 250 mm Ø

Adaptor block with two quick connectors to connect digital or analog manometers with i.e. G ½" male connections.

The adaptor block has two connections on each side for the pressure generator and the reference. (Mini measurement connections connections 1215 for pressures to 630 bar or M 16X1.5 high pressure connections for pressures up to 1200 bar)

Both quick connectors are serrated. For pressures up to 1200 bar they can be used manually without the use of a tool.

Dimensions: 40x40x340mm

Distance between the quick connectors: 260mm
