

Adaptor block with two quick connectors

Adaptor block with two quick connectors to connect digital or analog pressure gauges with i.e. G ½" male connections (other connections are available upon request)

The adaptor block is equipped with two connections on each side for the pressure generator and the reference (mini measurement connections 1215 for pressures to 630 bar or M 16X1.5 high pressure connections for pressures to 1200 bar)

Both quick connectors are serrated. For pressures up to 1200 bar they can be used manually without the use of a tool.

Dimensions: 40 x 40 x 250 mm

Distance between the quick connectors: 170 mm
