

KS-F-Vx00

Complete Mobile Calibration Station

- **From Vacuum to 400 bar**
Pressure and vacuum supply is integrated in the mobile 19"-rack
- **Pressure Controller**
Fluke 6270A / 8270A
or Additel ADT 780
Accuracy up to $\pm 0,01$ %
- **Customized pressure connections possible**
- **Only 230V power supply necessary**
- **DAkKS-Calibration on request**
- **Also suitable for on-site calibration**

Figure. Calibration Station KS-F-V200
Illustration varies by model

You want to be mobile without having to move a lot of equipment?

**Then we have the optimal solution for you:
Calibration Station KS-F-Vx00 from vacuum to 400 bar**

All you need is a 230V power supply. Pressure and Vacuum generator are integrated in the mobile 19" rack. Both factory calibration or calibration according to DAkkS guidelines is possible with an accuracy of up to 0,01%. Various ADT780 models from Additel or Fluke 6270A / 8270A can be used as controllers. When using the Fluke 6270A / 8270A, up to 5 different measuring ranges can be used simultaneously due to the modular design of the controller. The field of application of this system is not only limited to the laboratory area, the KS-F-Vx00 is also excellently applicable in the production plant.

By DAkkS accredited laboratory according to DIN EN ISO / IEC 17025: 2018. The accreditation is valid only for the quantities listed in the accreditation scope. (Our Laboratory number is D-K-15055-01-00).
